

## Did you know?

Each plant has a unique tolerance to air pollution, measured by its **APTI** (Air Pollution Tolerance Index) value.

### Classification Based on APTI Score:

**APTI > 17 – Highly Tolerant (e.g., Neem, Peepal, Banyan)**

**12 < APTI ≤ 17 – Intermediate Tolerance**

**APTI ≤ 12 – Sensitive (e.g., Mango, Gulmohar, Ashoka)**
